Mechanisms of Ageing and Development
81 (1995) 173–175

mechanisms of ageing and development

Subject index

Volume 81 (1995)

Adenylate cyclase; Aging; β-Adrenoceptors; GTP binding proteins; ADP-ribosylation; Isoproterenol; Forskolin **81**, 1

ADP-ribosylation; Aging; β-Adrenoceptors; Adenylate cyclase; GTP binding proteins; Isoproterenol; Forskolin **81**, 1

β-Adrenoceptors; Aging; Adenylate cyclase; GTP binding proteins; ADP-ribosylation; Isoproterenol; Forskolin **81**, 1

Age; Bone organ culture; Bone resorption; 1α,25-dihydroxycholecalciferol; Interleukin-1β; Prostaglandin E_2 **81**, 83

Aged mice; *Legionella pneumophila*; Interferon-gamma; Macrophage; Natural resistance **81**, 97

Ageing; Glutamate; Aspartate; Release; Uptake; Development; Tissue slices; Synaptosomes **81**, 61

Aging; β-Adrenoceptors; Adenylate cyclase; GTP binding proteins; ADP-ribosylation; Isoproterenol; Forskolin **81**, 1

Aging; Multiple myeloma; Mortality; Epidemiology; Differential survival **81**, 131

Aging; Oxidative stress; Oxygen free radicals; Gerbil; Protein damage; DNA damage **81**, 15

Aging mouse brain; Free-radical damage; Oxidative stress; Free-radical scavenging enzymes; Lipid peroxidation; Protein oxidation **81**, 73

Aminotriazole; Human diploid fibroblast; Replicative capacity; Oxygen; Catalase; Superoxide dismutase; Glutathione peroxidase; Glutathione **81**, 159

Apoptosis; Nitric oxide; Nitric oxide synthase; Cytokine; Human umbilical vein endothelial cells (HUVECs); In vitro ageing **81**, 27

Aspartate; Glutamate; Release; Uptake; Development; Ageing; Tissue slices; Synaptosomes **81**, 61

Autophagocytosis; Cysteine; Oxygen radicals; Lipofuscin; Lysosomes **81**, 37

Bone organ culture; Age; Bone resorption; 1α,25-dihydroxycholecalciferol; Interleukin-1β; Prostaglandin E_2 **81**, 83

Bone resorption; Age; Bone organ culture; 1α,25-dihydroxycholecalciferol; Interleukin-1β; Prostaglandin E_2 **81**, 83

Catalase; Human diploid fibroblast; Replicative capacity; Oxygen; Superoxide dismutase; Glutathione peroxidase; Glutathione; Aminotriazole **81**, 159

Cyclin D_1; Human fibroblasts; Senescence **81**, 139

Cysteine; Autophagocytosis; Oxygen radicals; Lipofuscin; Lysosomes **81**, 37

Cytokine; Nitric oxide; Nitric oxide synthase; Apoptosis; Human umbilical vein endothelial cells (HUVECs); In vitro ageing **81**, 27

Development; Glutamate; Aspartate; Release; Uptake; Ageing; Tissue slices; Synaptosomes **81**, 61

Differential survival; Multiple myeloma; Mortality; Aging; Epidemiology **81**, 131

1α,25-dihydroxycholecalciferol; Age; Bone organ culture; Bone resorption; Interleukin-1β; Prostaglandin E_2 **81**, 83

DNA damage; Aging; Oxidative stress; Oxygen free radicals; Gerbil; Protein damage **81**, 15

Epidemiology; Multiple myeloma; Mortality; Aging; Differential survival **81**, 131

Evolution; Maximum life span; Mammals; Longevity; Natural selection; Genes **81**, 51

Forskolin; Aging; β-Adrenoceptors; Adenylate cyclase; GTP binding proteins; ADP-ribosylation; Isoproterenol **81**, 1

Free-radical damage; Oxidative stress; Aging mouse brain; Free-radical scavenging enzymes; Lipid peroxidation; Protein oxidation **81**, 73

Free-radical scavenging enzymes; Free-radical damage; Oxidative stress; Aging mouse brain; Lipid peroxidation; Protein oxidation **81**, 73

Genes; Maximum life span; Mammals; Evolution; Longevity; Natural selection **81**, 51

Gerbil; Aging; Oxidative stress; Oxygen free radicals; Protein damage; DNA damage **81**, 15

Glutamate; Aspartate; Release; Uptake; Development; Ageing; Tissue slices; Synaptosomes **81**, 61

Glutathione; Human diploid fibroblast; Replicative capacity; Oxygen; Catalase; Superoxide dismutase; Glutathione peroxidase; Aminotriazole **81**, 159

Glutathione peroxidase; Human diploid fibroblast; Replicative capacity; Oxygen; Catalase; Superoxide dismutase; Glutathione; Aminotriazole **81**, 159

GTP binding proteins; Aging; β-Adrenoceptors; Adenylate cyclase; ADP-ribosylation; Isoproterenol; Forskolin **81**, 1

Human diploid fibroblast; Replicative capacity; Oxygen; Catalase; Superoxide dismutase; Glutathione peroxidase; Glutathione; Aminotriazole **81**, 159

Human umbilical vein endothelial cells (HUVECs); Nitric oxide; Nitric oxide synthase; Cytokine; Apoptosis; In vitro ageing **81**, 27

Human fibroblasts; Cyclin D_1; Senescence **81**, 139

In vitro ageing; Nitric oxide; Nitric oxide synthase; Cytokine; Apoptosis; Human umbilical vein endothelial cells (HUVECs) **81**, 27

Interferon-gamma; *Legionella pneumophila*; Macrophage; Natural resistance; Aged mice **81**, 97

Interleukin-1β; Age; Bone organ culture; Bone resorption; 1α,25-dihydroxycholecalciferol; Prostaglandin E_2 **81**, 83

Isoproterenol; Aging; β-Adrenoceptors; Adenylate cyclase; GTP binding proteins; ADP-ribosylation; Forskolin **81**, 1

Legionella pneumophila; Interferon-gamma; Macrophage; Natural resistance; Aged mice **81**, 97

Lipid peroxidation; Free-radical damage; Oxidative stress; Aging mouse brain; Free-radical scavenging enzymes; Protein oxidation **81**, 73

Lipofuscin; Autophagocytosis; Cysteine; Oxygen radicals; Lysosomes **81**, 37

Longevity; Maximum life span; Mammals; Evolution; Natural selection; Genes **81**, 51

Lysosomes; Autophagocytosis; Cysteine; Oxygen radicals; Lipofuscin **81**, 37

Macrophage; *Legionella pneumophila*; Interferon-gamma; Natural resistance; Aged mice **81**, 97

Mammals; Maximum life span; Evolution; Longevity; Natural selection; Genes **81**, 51

Maximum life span; Mammals; Evolution; Longevity; Natural selection; Genes **81**, 51

Mortality; Multiple myeloma; Aging; Epidemiology; Differential survival **81**, 131

Multiple myeloma; Mortality; Aging; Epidemiology; Differential survival **81**, 131

Natural resistance; *Legionella pneumophila*; Interferon-gamma; Macrophage; Aged mice **81**, 97

Natural selection; Maximum life span; Mammals; Evolution; Longevity; Genes **81**, 51

Nitric oxide; Nitric oxide synthase; Cytokine; Apoptosis; Human umbilical vein endothelial cells (HUVECs); In vitro ageing **81**, 27

Nitric oxide synthase; Nitric oxide; Cytokine; Apoptosis; Human umbilical vein endothelial cells (HUVECs); In vitro ageing **81**, 27

Oxidative stress; Aging; Oxygen free radicals; Gerbil; Protein damage; DNA damage **81**, 15

Oxidative stress; Free-radical damage; Aging mouse brain; Free-radical scavenging enzymes; Lipid peroxidation; Protein oxidation **81**, 73

Oxygen; Human diploid fibroblast; Replicative capacity; Catalase; Superoxide dismutase; Glutathione peroxidase; Glutathione; Aminotriazole **81**, 159

Oxygen free radicals; Aging; Oxidative stress; Gerbil; Protein damage; DNA damage **81**, 15

Oxygen radicals; Autophagocytosis; Cysteine; Lipofuscin; Lysosomes **81**, 37

Prostaglandin E_2; Age; Bone organ culture; Bone resorption; 1α,25-dihydroxycholecalciferol; Interleukin-1β **81**, 83

Protein damage; Aging; Oxidative stress; Oxygen free radicals; Gerbil; DNA damage **81**, 15

Protein oxidation; Free-radical damage; Oxidative stress; Aging mouse brain; Free-radical scavenging enzymes; Lipid peroxidation **81**, 73

Release; Glutamate; Aspartate; Uptake; Development; Ageing; Tissue slices; Synaptosomes **81**, 61

Replicative capacity; Human diploid fibroblast; Oxygen; Catalase; Superoxide dismutase; Glutathione peroxidase; Glutathione; Aminotriazole **81**, 159

Senescence; Cyclin D_1; Human fibroblasts **81**, 139

Superoxide dismutase; Human diploid fibroblast; Replicative capacity; Oxygen; Catalase; Glutathione peroxidase; Glutathione; Aminotriazole **81**, 159

Synaptosomes; Glutamate; Aspartate; Release; Uptake; Development; Ageing; Tissue slices **81**, 61

Tissue slices; Glutamate; Aspartate; Release; Uptake; Development; Ageing; Synaptosomes **81**, 61

Uptake; Glutamate; Aspartate; Release; Development; Ageing; Tissue slices; Synaptosomes **81**, 61
